

Monitor and manage your trial from one central location

The Avery four-panel results screen presents comprehensive clinical trial data, including alert values and other critical data, in a single, easy-to-read screen.

Select a test subject from the simple pick-list, searchable by various criteria, such as patient initials, study site, date range and more.

Receive abnormal alerts immediately on the intuitive, color coded impression panel.

The screenshot displays a web browser window titled 'Spectra - Microsoft Internet Explorer'. The interface is divided into several panels:

- Top Panel:** Navigation menu (Navigate, File, View, Reports, Patient, Help) and search filters for Patient, Provider, Source, and Date.
- Table Panel:** A table listing patient visits with columns for St, Type, Tests, Patient, Obtained/Requested, Source, Requested/Reviewed, and ID/Accession. It shows multiple visits for a patient with various tests like P58, PHT, and BCG.
- Impression Panel:** A list of abnormal test results with values and units, such as 'H C REACTIVE PROTEIN 14.4 mg/L' and 'H PHOSPHORUS 7.1 mg/dL'.
- Table Panel:** A table showing test results with columns for Test, Value, Units, Range, and Remark. It includes values for Bicarbonate, Calcium, Phosphorus, and Triglyceride.
- Graph Panel:** A line graph showing the trend of Phosphorus levels over time. The x-axis represents dates from 05/02/05 to 07/27/05, and the y-axis represents Phosphorus levels in mg/dL. The graph shows values of 6.5, 4.9, 4.7, 6.1, and 7.1 at different points.

View information on test subjects through the comprehensive details panel.

Find results interpretation assistance in the graphing panel, including key event markers and a simple legend.

Bringing clarity to clinical trial management

A secure, web-based system that is unique to Spectra Clinical Research, Averity streamlines clinical trial monitoring and management, giving you direct access to critical trial data while enabling immediate results analysis and reporting. Averity ensures the safety and efficiency of trials by delivering timely, accurate results, whether you're conducting a small, physician-led investigation or a large, multi-center clinical trial.

Averity supports clinical trial monitoring and management by enabling:

Enhanced Safety Monitoring

24/7 access to critical data for timely results analysis and the streamlined processing of abnormal value alerts

Efficient Trial Management

24-hour test result turnaround from the time Spectra receives a specimen, and the elimination of manual report building and paper-based processing

Greater Efficiency

Cost-saving, online test management and results delivery for up-to-the-minute information sharing among the laboratory, sponsors and researchers

Intuitive, Flexible Data Processing

Receive complete critical trial information, data analysis support, and test result histories through a single, customizable results page
